RNDPOINT DIGITAL WALLET SOLUTION

powered by ProcessMIX

ABOUT SOLUTION

RNDpoint offers an all-in-one **digital wallet solution** with a unique, customizable backend core, designed for rapid market deployment. It seamlessly blends **customizable modules** with region-specific adaptations, offering a comprehensive suite of digital banking services including P2P transactions, contactless payments, and investment advice.

Its modular construction, **based on extensive FinTech experience**, enables efficient backend flow development, significantly reducing time-to-market.

Why choose Digital Wallet Solution by RNDpoint?

Designed by Industry Experts

Our team of 300+ in-house engineers gathered experts who worked in McKinsey, Barclays, and Mastercard. We understand the unique challenges and opportunities in the digital banking sector, offering expert guidance to launch a digital wallet successfully.

ProcessMIX - Low-Code System

ProcessMIX facilitates the generation of native code, enabling the swift deployment of custom backends of digital banking projects. This robust platform is designed to handle high loads and allows for rapid integrations, while its AI-adaptive capabilities significantly accelerate development, reduce costs, and ensure seamless scalability and efficiency.

Experience Working with Leading Banks

Since 2014, RNDpoint has established itself as a reliable technology ally for major players in the FinTech and banking sectors, including esteemed clients like FICO, Jumio, Danske Bank, First Abu Dhabi Bank, and Teradata.
